

Inovex approved to lead first US based OSGi Users' Group in Washington DC Metro Area

Annapolis, Maryland – August 18th, 2011 – Today Inovex Information Systems announced it is leading the first US based OSGi™ Users' Forum for the Washington DC Metro Area. The OSGi Alliance approved the launch of the DC area consortium late last month. Paul Hadrosek, principal architect from Inovex will serve as the group's chairman; and Jack Rodriguez of Avid Technology Professionals will serve as secretary. Founding members include Samuel Chance of Inovex, Stan Moyer of Telcordia and Eddie Lee of PTFS.

“The DC Metro OSGi Users' Forum will provide our region a structured medium within which OSGi technology adopters and practitioners can meet and exchange ideas, and heighten awareness of this important services platform and approach,” said Paul Hadrosek. Interested individuals and organization can learn more and join the DC Metro OSGi Forum at <http://dc.us.osgiusers.org/Main/HomePage>.

OSGi is a system and service platform that enables the modular assembly of software built with Java technology. Its framework facilitates an environment for the modularization of applications into smaller modules, called bundles, and assures interoperability of applications and services over a variety of networked devices. OSGi technology's benefits to embedded devices include decreasing time-to-market, extending the lifetime of hardware and reducing the cost of ownership.

The reduced complexity, lack of dependence on proprietary components and applications, its adaptive nature and easy deployment enables developers to focus on the real problems and worry less about infrastructure. The OSGi specifications are now used in applications in mobile phones, automobiles, industrial automation, building automation, PDAs, grid computing and enterprise class application servers.

The OSGi Alliance is a worldwide consortium of technology innovators that advances a proven and mature process to create open specifications that enable modular assembly of software built with Java technology. The alliance provides specifications, reference implementations, test suites and certification to foster a valuable cross-industry ecosystem. Member companies collaborate within an egalitarian, equitable and transparent environment and promote adoption of OSGi technology through business benefits, user experiences and forums.

About Inovex

Located at the Chesapeake Innovation Center, Inovex Information Systems is a Veteran Owned Small Business that specializes in delivering Cyber and Cloud Architecture Information Technology solutions for Federal Government and Commercial customers. Headquartered in Annapolis, Maryland, Inovex is a leader in formal, machine-interpretable Knowledge Modeling, Semantic Data Integration services and Cloud Integration Platform as a Service (PaaS) using distributed OSGi™ Services technology for operational and developmental systems. For more information please contact Inovex at 443-756-7197, visit us at www.inovexcorp.com, or email us at information@inovexcorp.com.
